9. ☐ Other _____.

1. Claims 1, 3-16, 18-34 are pending.
2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5-17-04 has been entered.
3. The following is an examiner's statement of reasons for allowance: In view of the 37 CFR 1.132 declaration filed on 5-17-04 by Dr. Leonard Kohn and in view of the 37 CFR 1.132 declaration filed on 5-17-04 by Dr James Brown the 35 USC 103 rejection has been obviated and claims have been held as allowable in view of the demonstration of long felt need. Long felt need was demonstrated by:

1. The need must have been a persistent one that was recognized by those of ordinary skill in the art.

Dr. Kohn's statement as an expert in the art that the need for a more accurate test with fewer false positive in patients with Grave's disease was persistent, as evidenced by the chronology of different tests over a 42 year period for detecting thyroid stimulating antibodies in Graves patients. The chronology was evidenced with IDS references.

2. The long felt need must not have been satisfied by another before the invention by applicant.

Dr. Kohn's statements as evidenced by IDS references supports an art recognized failure of an accurate and increasingly sensitive test for thyroid stimulating antibodies.

3. The invention must in fact satisfy the long felt need.

Art Unit: 1644

This requirement was demonstrated by Dr. Brown's statements that eight of the ten commercial labs known by him to test for thyroid stimulating antibodies have adopted his invention to test for thyroid stimulating antibodies.

Furthermore, the specification clearly teaches fewer false positives due to increased sensitivity in an assay comparing the previously art recognized assay for thyroid stimulating antibodies with the instant invention.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. The fax number for the organization where this application or proceeding is assigned is 703-872-9306.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
